

DIRECTIONS

- 1) Shake container well before using.
- 2) Mix one (1) part of this concentrate with nine (9) parts water. (13 ounces of concentrate will make 1 gallon)
- 3) Make application to target area at a rate of 10 gallons of diluted material per 1/2 acre.
- 3) Allow 20 minutes for this product to dry before watering of any kind, including natural rainfall.
- 4) This product can be applied in any climate or temperature as long as spray head and liquid are not frozen.
- 5) Repeat application at first appearance of geese, then every 30 days regardless of mowing and maintenance.

Results will vary slightly depending on geese populations and weather conditions.
